Lower Energy Costs

Two-stage cooling design operates on high only at peak times, delivering precise cooling while lowering energy usage and electric bills.

Advanced Comfort

The *Comfort Control² System* actively keeps your home comfortable and your air conditioner running smoothly through 32 performance-monitoring points when paired with a matching indoor component and thermostat.

Reliability and Durability

Solid construction ensures quiet operation, shields against environmental hazards and provides quality operation backed by a 10-year limited parts and conditional total unit replacement warranty.

RELY ON RUUD.™

THE COMFORT CONTROL² SYSTEM

32
ACTIVE
MONITORING
POINTS

When paired with a compatible indoor component and thermostat, this advanced feature makes it easy to maximize your family's comfort and utility cost savings. The *Comfort Control² System* ensures your Ruud *Ultra Series* air conditioner runs at top efficiency by actively monitoring your equipment – measuring temperature and relative humidity while providing detailed diagnostics for ease of repair and maintenance, including routine reminders for air filter changes.

EXPERIENCE THE BENEFITS OF SMART AC TECHNOLOGY

The Ruud *Ultra Series* Two-Stage Air Conditioner featuring the *Comfort Control² System* is designed for maximum efficiency, offering smart technology that helps your family experience the highest level of comfort, while lowering energy use and electricity bills.

Less Electricity Usage Two-stage cooling design operates on low most of the time, providing comfortable temperatures while reducing energy use. The system only operates on high when necessary during peak, warm weather conditions. Your energy savings are further increased by a cooling efficiency rating of up to 19.5 SEER.

Greater Comfort When matched with a Ruud variable speed furnace or air handler, the system adjusts airflow to help control humidity 102% more effectively than standard efficiency units, for unsurpassed comfort in the cooling mode.

Simply Attractive In addition to the low-profile design, the neutral color allows for equipment placement that doesn't take away from the beauty of your home.

Quiet Operation Excessively loud noise levels are eliminated by the compressor's outer blanket, which lowers the sound of the unit's overall performance.

ENJOY LONG-LASTING QUALITY & DURABILITY

We understand that purchasing heating and cooling equipment is an investment. With Ruud, you can rest easy knowing you're getting maximum comfort with industry-leading reliability. We've designed the Ruud *Ultra Series* for durability and performance.

Solid Construction A galvanized steel cabinet protects the coil from hail, lawn debris and other erosive elements.

Durable Finish Powder-painted metal cabinet finish exceeds the industry 1,000-hour salt-spray testing requirement, defending it against environmental hazards and rust, keeping your investment looking good for years to come.

Ruud Reliability Complete factory run testing ensures your Ruud equipment operates at peak performance before being installed in your home.

BENEFITS AT-A-GLANCE

Efficiency:

Up to 19.5 SEER/14 EER

Available Sizes:

2, 3, 4 and 5 ton

Compressor:

Two-Stage Scroll[®] compressor
